

# THE GREEN MACHINE

## Pallet Dismantling Band Saw

**The Green Machine is designed to dismantle and strip broken or unwanted pallets back down into component parts.**

The pallets are manually fed through the green machine pallet dismantler machine and a bandsaw blade separates the blocks and boards by cutting the nails.

The pallet boards and pallet blocks etc. can then be recycled into new pallets or used to repair pallets.

For more information or to purchase a Green Machine pallet dismantler band saw please contact us.

### MACHINE FEATURES
