

## **THE PALLET TRIM SAW**

### **Pallet Board Circular Saw**

**This machine is designed to trim pallet boards to the required lengths.**

It can be used for both virgin and recycled timber and will cut through nails as well as timber.

It is semi-automatic so the boards are manually placed on the machine and fed through the pallet board trim saw machine by an automatic chain drive.

Nail cutting saw blades enable the machine to deal with recycled timber with nails.

### **MACHINE FEATURES**

Fully CE Compliant

One man operated

Semi-Automatic Machine

If used in 'tandam' with a pallet dismantler/stripper it will save recycling costs.

Automatic chain feed working at 20 boards per minute (1200 per hour)

4 or more adjustable stops allowing boards lengths of 550mm-1700mm to be cut at one pass

Can use TCT NiMatrix nail cutting circular saw blades
